Self-assessment for COM427 2nd Assignment

Please assess your contribution to the preparation of the solution to the COM427 exercise in relation to that of your other team member.

Did each of you contribute equally? If so, each team member will be given an apportioning of 50%. If one person contributed more, and one a little less, the distribution of percentage weighting should reflect this, e.g. 60 + 40.

Allocate a mark for each member of your team. Ensure that the two marks together total 100.

Group members   **Assessment (% contribution)**

1. (Self) ID: B00730860   Name: James Johnston   Assessment 50%

2. Partner ID: B00714571   Name: Philip McRoberts   Assessment 50%
                                                              TOTAL = 100%

What particular responsibility/tasks did you undertake during the preparation of the assignment solution?

1) Create the SQL 2 to include Count() and Max() count total bookings and see how many films are in the different cinemas.
2)Create the SQL 4 to display the films which are on show within the cinema which has been selected
3) Add in the links to the SQL within the html form
4) Design the core of the database within the report
5) select the key frames for some of the tables
6) Created the SQL 6 file which would allow new film data to be inserted into the database.
